Pragmatic Execution

The Reality Check for the Boardroom

01 - 02

Most transformation strategies look spectacular on paper but dissolve in execution.

Ambition gets lost between disconnected silos of technology, procurement and supply chain, and ESG compliance.

We stop the drift. Sustensor Solutions bridges the execution gap. We turn sustainability ambition, digital change, and team capability into operating improvements the board can see.

WHO WE SERVE

Exclusively engineered for government-backed startups and listed companies across the region looking to lead the market.

THE BOTTOM LINE

We don't just deploy software or draft reports. We hardwire efficiency and compliance directly into your profit and loss statement.

The Integrated Sustensor Architecture

Four connected disciplines. One operating view.

01

Procurement Excellence - CIPS

THE LOGIC

Fragmented procurement lifecycles degrade commercial value and introduce severe governance risks.

THE SOLUTION

Our solution maps the 5 core dimensions of the CIPS Framework –Leadership & Organisation, Strategy & Policy, People, Processes & Systems and Performance Management to deliver full operational revamp. We build robust vendor management and procurement systems designed for strict Policy & DoA compliance, Risk management, local-content (LCGPA) compliance, Audit readiness, Operational performance and Sustainability governance & conformance.

Sustainability & Carbon Accounting Solutions

THE LOGIC

Vague net-zero promises trigger greenwashing accusations and compliance penalties under modern corporate governance.

THE SOLUTION

We deploy verifiable carbon accounting frameworks that turn ESG mandates into concrete, auditable data points that stand up to institutional scrutiny.

Digitisation & SaaS Applications

THE LOGIC

Legacy software creates operational friction and slows down fast-scaling, government-backed ventures.

THE SOLUTION

Scalable, hyper-localised Vendor Management, Procurement and Sustainability SaaS applications designed for rapid deployment and ERP (Oracle/SAP) integration or Standalone functionality, built to comply with your Policy & DoA and Regulatory requirements.

Applied Artificial Intelligence

THE LOGIC

Reactive decision-making is too slow for the pace of Saudi Vision 2030 and modern market competition.

THE SOLUTION

Predictive operations engines that actively future-proof your procurement forecasting, asset tracking, and carbon optimisation.

ONE ARCHITECTURE / NO SILOS

COLLAPSE CURRENT VIEW ^

Enterprise Capabilities Matrix

Intelligent vendor lifecycle management, contract sustainability tracking, audit-grade ESG reporting, and closed-loop SaaS procurement operations.

Vendor Management

GLOBAL PROCUREMENT & VENDOR SOLUTIONS

EXECUTIVE BRIEF & STRATEGIC MANDATE

Our enterprise equips modern organisations with agile, transparent, and automated vendor management systems. By bridging legacy enterprise resource planning with next-generation artificial intelligence, we eliminate procurement friction, enforce rigorous multi-jurisdiction compliance, and optimise vendor performance in real time.

• Vendor Onboarding

Self-service portals, automated KYC verification, and tax document parsing.

SIGNIFICANTLY ACCELERATES ONBOARDING CYCLES AND ELIMINATES ADMINISTRATIVE BACKLOGS.

• Risk Management

Continuous supplier risk monitoring, automated early warnings, and executive profiling heatmaps.

EQUIPS LEADERSHIP WITH ACTIONABLE RISK INTELLIGENCE, SUBSTANTIALLY REDUCING DISRUPTION EXPOSURE.

• Audit Readiness

Automated right-to-audit verification, pre-configured statutory audit dossiers, complete transactional provenance, and Local-content/LCGPA tracking.

MAXIMISES FIRST-PASS AUDIT SUCCESS AND SUBSTANTIALLY COMPRESSES AUDIT RESPONSE LEAD TIMES.

• Supplier Performance

Objective tier scorecards, delivery reliability analytics, and renewal alerts.

ENABLES DATA-DRIVEN RENEWALS AND RENEGOTIATIONS.

✦ STRATEGIC VALUE PROPOSITION

✓ AI-Native Architecture

Built from day one to leverage reasoning agents for deep document inspection and invoice reconciliation.

✓ Enterprise Security

Rigorous role-based access control (RBAC), multi-tenant data segregation, and audit logs.

✓ Fast Deployment

Cloud-first modular integration designed to plug seamlessly into existing accounting workflows.

Contract Sustainability Tracking

EMBEDDING ESG ACCOUNTABILITY INTO COMMERCIAL AGREEMENTS

EXECUTIVE BRIEF & STRATEGIC MANDATE

With the vast majority of corporate carbon footprints embedded within supplier networks, sustainability cannot remain an isolated policy. We transform static ESG pledges into active contractual covenants, continuous green SLA tracking, dual-submission low-carbon tender evaluations, and dynamic supplier incentive frameworks.

• Green SLA & ESG Covenants

Clause-level tracking of decarbonisation milestones, supplier code of conduct adherence, and automated covenant audits.

ELIMINATES SUPPLIER GREENWASHING AND ENFORCES RIGOROUS CONTRACTUAL ACCOUNTABILITY ACROSS STRATEGIC AGREEMENTS.

• Dual-Submission Low-Carbon Tendering

Systematic tender evaluation architecture comparing commercial baseline submissions against audited low-carbon and circular alternatives.

DRIVES SUBSTANTIAL SCOPE 3 CARBON INTENSITY REDUCTIONS AT CONTRACT AWARD STAGE.

• Performance-Linked Incentive Models

Contractual rebate, bonus, and penalty mechanisms tied to verified emissions milestones, renewable energy thresholds, and CBAM exposure.

ACCELERATES SUPPLIER DECARBONISATION VELOCITY COMPARED TO VOLUNTARY TARGETS.

• Supply Chain Traceability & Due Diligence

Algorithmic sub-tier supplier mapping ensuring full compliance with CSDDD, local content mandates (LCGPA), and ethical labour standards.

ELIMINATES THIRD-PARTY COMPLIANCE LIABILITIES WITH CONTINUOUS AUDIT-READY DATA VERIFICATION.

✦ STRATEGIC VALUE PROPOSITION

✓ Horizontal ESG Governance

Treats sustainability as an enterprise-wide commercial operating layer rather than an isolated silo.

✓ Pragmatic Milestone Tracking

Delivers measurable supplier progress with actionable data benchmarks across multi-tier networks.

✓ Regulatory Defensibility

Automated audit documentation protecting boards from greenwashing penalties and regulatory scrutiny.

Sustainability / ESG Reporting

INSTITUTIONAL-GRADE CARBON INTELLIGENCE & NON-FINANCIAL FILINGS

EXECUTIVE BRIEF & STRATEGIC MANDATE

Evolving regulatory frameworks—including CSRD (ESRS), ISSB (IFRS S1/S2), and regional capital market guidelines—demand verifiable data integrity. Our reporting engine unifies transactional procurement records, verified carbon accounting, and double materiality assessments into investor-ready, audit-defensible reporting rooms.

- Automated GHG Accounting (Scope 1–3)

Dynamic activity- and spend-based emission calculation engines mapped to GHG Protocol and regional emission factor databases.

SUBSTANTIALLY COMPRESSES ANNUAL ESG REPORTING AND AUDIT CYCLES WITH COMPLETE CALCULATION TRACEABILITY.

- Double Materiality & Regulatory Compliance

Automated CSRD (ESRS) and ISSB alignment tracking financial materiality alongside ecological and social impacts.

GUARANTEES ZERO COMPLIANCE BLIND SPOTS FOR SOVEREIGN WEALTH FUNDS, INSTITUTIONAL INVESTORS, AND REGULATORS.

- Third-Party Rating Harmonisation

Integrated benchmarking data pipelines aligned with EcoVadis, CDP, S&P Global, and regional stock exchange ESG registries.

MEASURABLY ELEVATES INSTITUTIONAL ESG STANDING AND BENCHMARK POSITIONS WITHIN THE FIRST REPORTING CYCLE.

- Executive & Investor Data Rooms

Real-time board dashboards, decarbonisation scenario modelling, and automated generation of verified investor ESG data rooms.

ACCELERATES SUSTAINABILITY-LINKED DEBT FINANCING AND LOWERS CORPORATE COST OF CAPITAL.

✦ STRATEGIC VALUE PROPOSITION

✓ Audit-Verified
Traceability

Every calculated emission figure links back to transactional invoices and verified supplier inputs.

✓ Multi-Framework
Interoperability

Single data entry point outputs compliant filings for CSRD, GRI, ISSB, and regional mandates.

✓ Decarbonisation
Forecasting

Predictive models simulate the financial and carbon impact of prospective procurement decisions.

Procurement Operations

SOURCE-TO-PAY (S2P) AUTOMATION & ENTERPRISE
CATEGORY INTELLIGENCE

EXECUTIVE BRIEF & STRATEGIC MANDATE

Built by procurement practitioners for commercial leadership, our cloud-native operations suite replaces manual approvals and fragmented legacy tools with a seamless, automated workflow spanning requisition, category management, DoA compliance, and bidirectional ERP synchronisation.

• Autonomous Source-to-Pay (S2P)

Guided requisitioning, digital RFx e-sourcing, reverse auctioning, catalogue management, and automated order dispatch.

DRAMATICALLY COMPRESSES OPERATIONAL CYCLE TIMES ACROSS ALL
PROCUREMENT EVENTS.

• AI Spend Intelligence & Category Workbench

Autonomous taxonomy categorisation of unstructured accounts payable data, supplier consolidation, and tail-spend mining.

UNLOCKS SUBSTANTIAL ADDRESSABLE COST SAVINGS THROUGH
CONSOLIDATED VOLUME AND ELIMINATED ROGUE SPEND.

• Delegation of Authority (DoA) Automation

Dynamic multi-tier approval matrix engine enforcing local financial controls, threshold limits, and segregation of duties (SoD).

ENFORCES RIGOROUS POLICY ADHERENCE, ELIMINATING UNAUTHORISED
BUDGET LEAKAGE AND AUDIT INFRACTIONS.

• Bidirectional ERP Connectors

Pre-configured, real-time connectors and webhooks for SAP S/4HANA, Oracle Cloud ERP, and Microsoft Dynamics 365.

SLASHES INTEGRATION LEAD TIMES FROM MONTHS TO WEEKS WITH BI-
DIRECTIONAL MASTER DATA INTEGRITY.

✦ STRATEGIC VALUE PROPOSITION

✓ Closed-Loop Lifecycle

Connects upfront category strategy directly to day-to-day transactional purchasing and settlement.

✓ Practitioner-Grade Toolkits

Embedded industry-tested RFP templates, evaluation criteria, and contract templates.

✓ Scalable Cloud Architecture

Microservices-based deployment supporting multi-subsidiary and holding company structures.

Engineered for the Region's Vision

KSA / GCC / MENA

Our guiding philosophy adapts globally applied and proven frameworks for a sustainable business to the unique realities and ambitions of the regional market. Powered by Sustensor solutions, our approach is explicitly calibrated to the high-velocity scaling demands of Saudi Vision 2030 and broader regional market governance, seamlessly aligning your corporate growth with the Kingdom's national economic progress.

CALIBRATED FOR

Resilient, decoupled scaling

ALIGNED WITH

Global climate efforts

A DECISION FOR THE NEXT
OPERATING CYCLE.

The Boardroom Verdict: De-Risk Your Next Quarter

Continuing to manage digital change, procurement and supply chain complexity, and ESG metrics independently is no longer a viable strategy—it is an operational liability.

✓ Stop managing silos.

✓ Start seeing measurable operating improvements.
