

CORPORATE CAPABILITY PROFILE

FOCUS & MANDATE

Enterprise Governance, CIPS Procurement & Carbon Accounting

REGIONAL CALIBRATION

Saudi Vision 2030 & Regional Market Growth

01 / EXECUTIVE BRIEFING

Transforming Ambition into Defensible Enterprise Execution

Continuing to manage digital change, procurement and supply chain complexity, and ESG metrics independently is an operational liability. Sustensor Solutions unifies these disciplines into a single high-integrity operating layer calibrated for the high-velocity scaling demands of the Kingdom and the wider region.

THE STRATEGIC EXECUTION GAP

Most transformation strategies dissolve in execution between disconnected silos of technology, procurement and supply chain, and ESG compliance. Fragmented records lead to audit vulnerabilities and compliance penalties under modern corporate governance.

THE SUSTENSOR OPERATING MODEL

We turn sustainability ambition, digital change, and team capability into operating improvements the board can see. We hardwire efficiency, local-content governance, and verifiable carbon data directly into corporate profit and loss statements.

THE STRATEGIC OPERATING BRIEF

FOCUS

Innovation for Sustainability
Sustainable Transformation
Long-term Value Creation

LENS

Systems Thinking
Purpose-driven Integration
Pragmatic Execution

BUSINESS IMPACT

Decoupled Scaling
Regulatory Defensibility
P&L Bottom-Line Integration

Target Clientele: Exclusively engineered for government-backed entities, sovereign gigaprojects, and listed corporations navigating accelerated growth and strict statutory compliance requirements.

02 / SYSTEM ARCHITECTURE

The Integrated Sustensor Architecture

Four connected disciplines. One operating view. A cohesive architecture designed to eliminate operational silos between commercial procurement, carbon governance, and technology.

01 Sustainability & Carbon Accounting Solutions DISCIPLINE LOGIC & SOLUTION	
THE STRATEGIC LOGIC Vague net-zero promises trigger greenwashing accusations and compliance penalties under modern corporate governance.	THE DELIVERED SOLUTION We deploy verifiable carbon accounting frameworks that turn ESG mandates into concrete, auditable data points that stand up to institutional scrutiny.
02 Procurement Excellence - CIPS DISCIPLINE LOGIC & SOLUTION	
THE STRATEGIC LOGIC Fragmented procurement lifecycles degrade commercial value and introduce severe governance risks.	THE DELIVERED SOLUTION Our solution maps the 5 core dimensions of the CIPS Framework –Leadership & Organisation, Strategy & Policy, People, Processes & Systems and Performance Management to deliver full operational revamp. We build robust vendor management and procurement systems designed for strict Policy & DoA compliance, Risk management, local-content (LCGPA) compliance, Audit readiness, Operational performance and Sustainability governance & conformance.
03 Digitisation & SaaS Applications DISCIPLINE LOGIC & SOLUTION	
THE STRATEGIC LOGIC Legacy software creates operational friction and slows down fast-scaling, government-backed ventures.	THE DELIVERED SOLUTION Scalable, hyper-localised Vendor Management, Procurement and Sustainability SaaS applications designed for rapid deployment and ERP (Oracle/SAP) integration or Standalone functionality, built to comply with your Policy & DoA and Regulatory requirements.
04 Applied Artificial Intelligence DISCIPLINE LOGIC & SOLUTION	
THE STRATEGIC LOGIC Reactive decision-making is too slow for the pace of Saudi Vision 2030 and modern market competition.	THE DELIVERED SOLUTION Predictive operations engines that actively future-proof your procurement forecasting, asset tracking, and carbon optimisation.

Integrated Operating Principle:

Commercial procurement decisions feed carbon accounting; compliance rules govern contract execution.

ZERO OPERATIONAL SILOS

03 / CAPABILITIES MATRIX – PART I

Lifecycle Governance & Contract Sustainability

Verifiable deliverables and business impact for core enterprise vendor lifecycle and Scope 3 contractual accountability.

01 Vendor Management

CORE ENTERPRISE LIFECYCLE

GLOBAL PROCUREMENT & VENDOR SOLUTIONS

Our enterprise equips modern organisations with agile, transparent, and automated vendor management systems. By bridging legacy enterprise resource planning with next-generation artificial intelligence, we eliminate procurement friction, enforce rigorous multi-jurisdiction compliance, and optimise vendor performance in real time.

DOMAIN	KEY DELIVERABLES	BUSINESS IMPACT
Vendor Onboarding	Self-service portals, automated KYC verification, and tax document parsing.	Significantly accelerates onboarding cycles and eliminates administrative backlogs.
Risk Management	Continuous supplier risk monitoring, automated early warnings, and executive profiling heatmaps.	Equips leadership with actionable risk intelligence, substantially reducing disruption exposure.
Audit Readiness	Automated right-to-audit verification, pre-configured statutory audit dossiers, complete transactional provenance, and Local-content/LCGPA tracking.	Maximises first-pass audit success and substantially compresses audit response lead times.
Supplier Performance	Objective tier scorecards, delivery reliability analytics, and renewal alerts.	Enables data-driven renewals and renegotiations.

CORE PILLARS:

• AI-NATIVE ARCHITECTURE

• ENTERPRISE SECURITY

• FAST DEPLOYMENT

02 Contract Sustainability Tracking

SCOPE 3 & GREEN GOVERNANCE

EMBEDDING ESG ACCOUNTABILITY INTO COMMERCIAL AGREEMENTS

With the vast majority of corporate carbon footprints embedded within supplier networks, sustainability cannot remain an isolated policy. We transform static ESG pledges into active contractual covenants, continuous green SLA tracking, dual-submission low-carbon tender evaluations, and dynamic supplier incentive frameworks.

DOMAIN	KEY DELIVERABLES	BUSINESS IMPACT
Green SLA & ESG Covenants	Clause-level tracking of decarbonisation milestones, supplier code of conduct adherence, and automated covenant audits.	Eliminates supplier greenwashing and enforces rigorous contractual accountability across strategic agreements.
Dual-Submission Low-Carbon Tendering	Systematic tender evaluation architecture comparing commercial baseline submissions against audited low-carbon and circular alternatives.	Drives substantial Scope 3 carbon intensity reductions at contract award stage.
Performance-Linked Incentive Models	Contractual rebate, bonus, and penalty mechanisms tied to verified emissions milestones, renewable energy thresholds, and CBAM exposure.	Accelerates supplier decarbonisation velocity compared to voluntary targets.
Supply Chain Traceability & Due Diligence	Algorithmic sub-tier supplier mapping ensuring full compliance with CSDDD, local content mandates (LCGPA), and ethical labour standards.	Eliminates third-party compliance liabilities with continuous audit-ready data verification.

CORE PILLARS:

• HORIZONTAL ESG GOVERNANCE

• PRAGMATIC MILESTONE TRACKING

• REGULATORY DEFENSIBILITY

04 / CAPABILITIES MATRIX – PART II

ESG Reporting & Procurement Operations

Institutional-grade non-financial reporting and autonomous Source-to-Pay enterprise execution.

03 Sustainability / ESG Reporting

AUDIT-GRADE DISCLOSURE ENGINE

INSTITUTIONAL-GRADE CARBON INTELLIGENCE & NON-FINANCIAL FILINGS

Evolving regulatory frameworks—including CSRD (ESRS), ISSB (IFRS S1/S2), and regional capital market guidelines—demand verifiable data integrity. Our reporting engine unifies transactional procurement records, verified carbon accounting, and double materiality assessments into investor-ready, audit-defensible reporting rooms.

DOMAIN	KEY DELIVERABLES	BUSINESS IMPACT
Automated GHG Accounting (Scope 1-3)	Dynamic activity- and spend-based emission calculation engines mapped to GHG Protocol and regional emission factor databases.	Substantially compresses annual ESG reporting and audit cycles with complete calculation traceability.
Double Materiality & Regulatory Compliance	Automated CSRD (ESRS) and ISSB alignment tracking financial materiality alongside ecological and social impacts.	Guarantees zero compliance blind spots for sovereign wealth funds, institutional investors, and regulators.
Third-Party Rating Harmonisation	Integrated benchmarking data pipelines aligned with EcoVadis, CDP, S&P Global, and regional stock exchange ESG registries.	Measurably elevates institutional ESG standing and benchmark positions within the first reporting cycle.
Executive & Investor Data Rooms	Real-time board dashboards, decarbonisation scenario modelling, and automated generation of verified investor ESG data rooms.	Accelerates sustainability-linked debt financing and lowers corporate cost of capital.

CORE PILLARS: • AUDIT-VERIFIED TRACEABILITY • MULTI-FRAMEWORK INTEROPERABILITY • DECARBONISATION FORECASTING

04 Procurement Operations

CLOSED-LOOP CLOUD PLATFORM

SOURCE-TO-PAY (S2P) AUTOMATION & ENTERPRISE CATEGORY INTELLIGENCE

Built by procurement practitioners for commercial leadership, our cloud-native operations suite replaces manual approvals and fragmented legacy tools with a seamless, automated workflow spanning requisition, category management, DoA compliance, and bidirectional ERP synchronisation.

DOMAIN	KEY DELIVERABLES	BUSINESS IMPACT
Autonomous Source-to-Pay (S2P)	Guided requisitioning, digital RFx e-sourcing, reverse auctioning, catalogue management, and automated order dispatch.	Dramatically compresses operational cycle times across all procurement events.
AI Spend Intelligence & Category Workbench	Autonomous taxonomy categorisation of unstructured accounts payable data, supplier consolidation, and tail-spend mining.	Unlocks substantial addressable cost savings through consolidated volume and eliminated rogue spend.
Delegation of Authority (DoA) Automation	Dynamic multi-tier approval matrix engine enforcing local financial controls, threshold limits, and segregation of duties (SoD).	Enforces rigorous policy adherence, eliminating unauthorised budget leakage and audit infractions.
Bidirectional ERP Connectors	Pre-configured, real-time connectors and webhooks for SAP S/4HANA, Oracle Cloud ERP, and Microsoft Dynamics 365.	Slashes integration lead times from months to weeks with bi-directional master data integrity.

CORE PILLARS: • CLOSED-LOOP LIFECYCLE • PRACTITIONER-GRADE TOOLKITS • SCALABLE CLOUD ARCHITECTURE

05 / REGIONAL LENS & ENGAGEMENT

Engineered for Saudi Vision 2030 & Regional Leadership

Our guiding philosophy adapts globally applied and proven frameworks for a sustainable business to the unique realities and ambitions of the regional market. Powered by Sustensor solutions, our approach is explicitly calibrated to the high-velocity scaling demands of Saudi Vision 2030 and broader regional market governance, seamlessly aligning your corporate growth with the Kingdom's national economic progress.

HIGH-VELOCITY SCALING

Engineered for the aggressive implementation timelines of sovereign gigaprojects and ambitious regional industry champions.

LCGPA & LOCAL CONTENT

Native integration for local supplier prioritisation, national workforce compliance, and statutory local content audit readiness.

DECOUPLED EMISSIONS

Enabling multi-fold commercial expansion while systematically decoupling corporate Scope 1-3 emissions from revenue growth.

Executive Engagement & Direct Channels

Direct access for prospective clients, vendor management leadership, and enterprise sustainability teams.
